

iPad Specifications

(Classes of 2020, 2019 and 2018 for school year 2017-2018)

Students may continue to use their current iPads. If a new device is being purchased, the specifications that must be met for this iPad are listed below. Your daughter must register her device onto our Meraki network for the coming school year.

Specifications:

iPad Air or later, with a minimum of 64 GB. The cellular option is not necessary. iPad Pros are acceptable, but please note the iPad mini does not meet our specifications. Your daughter will need to protect her iPad with an appropriate case. Cases should protect both the screen and the corners, as these are the most often damaged. Please remember your daughter's iPad will most likely be in a backpack and choose your case accordingly. Your daughter will also need a separate Bluetooth wireless keyboard for her iPad.

The following apps must be installed on the iPad:

- Adobe Photoshop Express
- Adobe Reader
- Find my iPhone (universal)
- Google Docs
- Google Drive
- Google Slides
- Google Sheets
- iBooks
- iMovie
- Inspiration Maps
- Keynote
- Kindle
- Notability
- Pages
- Pearson E text for School App
- Phonto
- Schoology App

When your daughter receives her digital textbooks, she may need additional publisher specific apps which will be detailed on book list. Although other apps necessary for class may need to be purchased, all efforts will be taken to keep expenditures to a minimum.
